Station		
string	code	código SENAMHI
point	location	lat, lon
int	altitude_m	
bool	is_active	

TelegramSubscription		
string	chat_id	
string	department	vacío = todos
int	min_level	
bool	is_active	

WeatherObservation		
datetime	observed_at	
float	temperature	
float	humidity	
float	pressure	
float	cape	
float	k_index	
string	source	open-meteo

ModelArtifact		
uuid	id	
string	version	
string	status	training/ready/failed
string	best_model_type	mlp o lstm
float	accuracy	
float	roc_auc	
json	thresholds_json	umbrales Youden
bool	is_active	solo uno a la vez

StormAlert		
float	probability	calibrada 0-1
int	alert_level	1=Verde .. 4=Rojo
json	explanation_json	valores SHAP
datetime	notified_at	
datetime	telegram_notified_at	

ModelBenchmark	
string	model_type
int	cv_fold
float	roc_auc

Project	
string	name
date	start_date
date	end_date
bool	is_active

tiene frentes

tiene refugios fijos

M2M (empleados asignados)

GeoFence		
polygon	perimeter	frente de trabajo
bool	is_active	

RefugePoint		
point	location	coordenada fija
int	capacity	

MobileRefuge	
string	code
string	plate
int	capacity

conduce (FK conductor)

Employee		
string	full_name	
string	document_number	
string	device_id	único, para MQTT
string	fcm_token	para el push
int	last_alert_level	última alerta recibida
datetime	last_alert_sent_at
